SKILLS

Languages:

Python, JavaScript, C, C++,
Java, HTML, CSS, Dart

Technologies:

Django, Django REST, Flask,
AWS, Heroku, Docker,
Flutter, SQL, Vue.js,
jQuery, GitHub, Git, API's

Other:

REST API, HTTP, AJAX,
NumPy, Pandas, Matplotlib,
Scikit-Learn, Travis CI,
Bootstrap 4, Linux, UI/UX,
Responsive design, Testing,
Data visualizations, JSON

EDUCATION

**University of Houston -
Downtown**
**Bachelor of Science,
Computer science**
3 years

ACHIEVEMENTS

Microsoft:

1st place at Hackathon,
Smart-Infrastructure
December, 2019

HackerRank:

Python, Algorithms &
Data Structures
August, 2020

LANGUAGES

English
Excellent

Spanish
Native

EXPERIENCE

09/2020 - Current

Software Engineer
PeriShip | PeriPharma
Woodlands, TX

- Develop efficient and scalable algorithms for data-driven logistics Django apps.
- Design, and test dynamic front-end components with jQuery, Vue.js + AJAX.
- Contributing to agile development of robust customer and admin web portals, tracking over 170k shipments daily.

09/2019 - 04/2020

Python Developer
CAMS:
Consolidated Asset
Management Services
Houston, TX

 [www.brianruizy.com/
projects/cams.html](https://www.brianruizy.com/projects/cams.html)

- Contributed to development of oil & energy midstream analytics SaaS platform.
- Connected Flask framework to deploy Docker container(s) on AWS EC2.
- Implemented data pipeline which read AWS S3 buckets, cleaned CSV's files, and produced live Matplotlib data visualizations.
- Redesigned UI/UX to be cross-platform responsive using Bootstrap 4 and Sass.

05/2019 - 08/2019

Coding Instructor
University of Houston
Houston, TX

- Conducted project based learning to 60+ secondary-school students for an internationally accredited STEM camp.
- Taught procedural programming with Arduino's, video game logic design, and principles of OOP using Python + Java.

02/2019 - 03/2019

Data Analyst
Trace AI
Woodlands, TX
 www.traceup.com

- Contract with AI company, responsible for data acquisition, and exporting to a cloud data-lake, which curated analytics for 400+ athletes coming from TraceCam's and GPS telemetry devices (Tracers).

PROJECTS

Favours-io

Django, REST API, Flutter,
PostgreSQL, AWS,
 [www.github.com/favours-io](https://github.com/favours-io)

- Developing a location-based app, where users post "favours" in exchange for cash.
- Hosted on Linux Ubuntu server with Apache HTTP using Django WSGI, and storing files on scalable AWS S3 buckets.
- Designed REST API with DRF, consumed by Flutter for native iOS/Android apps. with CRUD operations to the database

COVID-19 Dashboard

Django, Plotly,
Pandas, Bootstrap 4,
Heroku, Travis CI
 [https://ncov-
dashboard.herokuapp.com](https://ncov-dashboard.herokuapp.com)

- Designed and Developed COVID-19 analytics dashboard, allowing users to explore real-time datasets and statistics.
- Dynamic asynchronous web-app features automated data reading, interactive charts and maps, automated CI/CD, and a mobile friendly UI / UX.

Bump.IT | Microsoft Hackathon

Azure Logic Apps, React,
Computer Vision, Jupyter
 [www.github.com/BrianRuizy/
2019-Microsoft-IoT-hackathon](https://github.com/BrianRuizy/2019-Microsoft-IoT-hackathon)

- Our app concepts the initiative to impact a \$3B dollar road potholes issue.
- Implemented pipeline for processing of mobile telemetry data, mapping with GeoPy, and automating SMS notifications.
- Helped with training unsupervised ML model to categorize cases and images

PROJECTS

**Twitter NLP
Sentiment Analysis**
[www.github.com/BrianRuizy/
tweets-sentiment-analysis](https://www.github.com/BrianRuizy/tweets-sentiment-analysis)

- Created a supervised machine learning natural language processing script, which effectively detects expression in typed console text
- Using Tweepy API, you can also find expression of in user's recent tweets

**Handwritten Digit
Recognition**
[www.github.com/BrianRuizy/
handwritten-digit-recognition](https://www.github.com/BrianRuizy/handwritten-digit-recognition)

- Implemented a machine learning classification model to predict the value of handwritten digits through supervised learning, with up to 95% accuracy.
- Used Scikit-learn, matplotlib, Support Vector Machine model

BookOMate
[www.github.com/Bookomate/
bookomate](https://www.github.com/Bookomate/bookomate)

- Co-leading development of peer-to-peer calendar booking, which aims at simplifying the process with an intuitive design and functionality.
- Implemented integrations to existing calendar apps, and social media OAuth user authentication.
- Working on back-end models ORM, class-based views, and URL routing.
- Managing limited dev-ops, from Heroku Dyno deployment to Travis CI
